

HEALTH & SAFETY TRAINING

Training | Qualification | Certification

In order to build a company with a **strong safety culture**, you must start with a well-trained workforce. SMART Safety Group offers an array of **health and safety training courses** to ensure your company and workforce are fully compliant on every job.

Key questions to ask concerning safety training across your organization include:

1. *Have your employees been trained in the latest health and safety standards implemented by OSHA?*
2. *Do you have any contracts requiring health and safety training that you are not able to self-perform?*

SMART Safety Group can provide hundreds of training courses that **increase workforce safety awareness, ensure OSHA compliance, and build an effective safety culture.**

We provide **specialized and critical health & safety training** in areas that include:

- *Silica Training*
- *Forklift & Scissor Lift Qualification*
- *Active Shooter Training*
- *First Aid/AED/CPR Certification*
- *Defensive Driving*
- *Excavating & Trenching*
- *Confined Space*
- *Electrical Safe Work Practices*

Working with SMART to train your workforce will **significantly improve workforce safety practices and behaviors**, which is the foundation of building an effective safety culture across your organization. The results decrease incidents, ensure compliance, and reduce lost time & workers' compensation claims.

We also offer bilingual (English/Spanish) training!

Contact us to learn how SMART can improve your company's safety performance through **health and safety training.**
